Cumulative Contents

Editorial	*I. G. C. Dryden*	2
Dispersion of the optical properties of carbonized vitrinites	*R. J. Marshall and D. G. Murchison*	4
A high precision semi-automatic semi-micro method for the determination of carbon and hydrogen in solid fuels	*D. B. Ratcliffe and A. T. S. Cunningham*	23
Water-soluble derivatives of Athabasca asphaltenes	*S. E. Moschopedis and J. G. Speight*	34
Vitrinite content and coke strength	*A. C. Cook and G. E. Edwards*	41
Infra-red spectra of Japanese coal: the absorption bands at 3450 and 1260 cm^{-1}	*Y. Ōsawa and J. W. Shih*	53
The halogenation of Athabasca asphaltenes with elemental halogen	*S. E. Moschopedis and J. G. Speight*	58
Chlorine and sodium in Illinois coals as determined by neutron activation analyses	*H. J. Gluskoter and R. R. Ruch*	65
Direct methanation of coal	*R. L. Zahradnik and R. A. Glenn*	77
Structural analysis of Athabasca asphaltenes by proton magnetic resonance spectroscopy	*J. G. Speight*	102
Mechanism of solvent extraction from coal and its chars with chloroform	*T. Yoshii and F. Yoshimura*	113
Variation in extraction yields from coal caused by preheating	*T. Yoshii and F. Yoshimura*	122
Mineral matter characteristics of some American coals	*J. V. O'Gorman and P. L. Walker, Jr*	135
Catalytic dehydrogenation of coal: Part 6. Yield of hydrogen from whole coals	*L. Reggel, I. Wender and R. Raymond*	152
Into the future with nuclear fuel	*M. Davis*	157
Reactions of Athabasca asphaltenes and heavy oil with metal chlorides	*J. G. Speight*	175
Micropore structure of coal	*Y. Toda, M. Hatami, S. Toyoda, Y. Yoshida and H. Honda*	187
The brown-coal/water system: Part 1. The effect of temperature on the evolution of water from brown coal	*D. J. Allardice and D. G. Evans*	201

The brown-coal/water system: Part 1. The effect of temperature on the evolution of water from brown coal	*D. J. Allardice and D. G. Evans*	201

Oxidative degradation of Athabasca asphaltenes	*S. E. Moschopedis and J. G. Speight*	211
Determination of proportions of coal components by automated microscopic reflectance scanning	*J. T. McCartney, H. J. O'Donnell and S. Ergun*	226
The brown-coal/water system: Part 2. Water sorption isotherms on bed-moist Yallourn brown coal	*D. J. Allardice and D. G. Evans*	236
The reactions of discharge-generated hydrogen species with coals and carbons: Part 2. Compositions and properties of partially reacted solids	*K. Kobayashi and N. Berkowitz*	254
Forms of binding of germanium in solid fuels	*E. E. Bekyarova and D. D. Rouschev*	272
The effect of an igneous intrusion upon the properties of a Durham coal	*H. Marsh*	280
A method for the calculation of molecular weights of aromatic compounds, and its application to petroleum fractions	*L. H. Ali*	298
Water adsorption on coals	*O. P. Mahajan and P. L. Walker, Jr*	308
The smaller molecules obtainable from coal and their significance: Part 2. High pressure extraction at 200–300°C	*M. Rahman and M. Vahrman*	318
Chloroform-extractable material from bituminous coals	*L. Lazarov, E. Zgurovska and G. Angelova*	338
Adsorption of dyes from aqueous solution by coals, chars, and active carbons	*S. P. Nandi and P. L. Walker, Jr*	345
The role of sorption of water vapour in the spontaneous heating of coal	*K. K. Bhattacharyya*	367
Continuous rapid carbonization of powdered coal by entrainment, and response surface analysis of data	*R. J. Belt, J. S. Wilson and J. J. S. Sebastian*	381
Fluidizing feeders for providing fine particles at low, stable flows	*R. J. Hamor and I. W. Smith*	394
Determination of the grindability of coals, shales and other minerals by a modified Hardgrove-machine method	*F. Agus and P. L. Waters*	405
Solubilization of an lvb coal by reductive alkylation	*H. W. Sternberg, C. L. Delle Donne, P. Pantages, E. C. Moroni and R. E. Markby*	432

The production of acetylene from liquid coal-based feedstocks using a submerged arc reactor	*W. R. Ladner and R. Wheatley*	443
Letters to the Editor		
Change in coal macerals	*T. K. Ghosh*	218
A correction for adsorbed acid in the carboxyl group estimation of coal	*G. S. De, S. Tumuluri and K. C. Lahiri*	222
Change of slope of Dubinin-Radushkevich adsorption isotherms of coal	*H. Marsh and B. Rand*	329
Low temperature coking of petroleum asphaltenes	*S. E. Moschopedis and J. G. Speight*	332
Quantitative analysis of pyrite in coal	*S. S. Pollack*	453
Small-angle light scattering from wood tissue, peat and lignite	*G. Šiškov and V. Šiškova*	454
Scanning electron microscopy of metallurgical cokes and residues from rapid pyrolysis of coals	*J. T. McCartney*	457
Recent Developments and Notes	*D. G. Edwards*	91

Abstracts in French and German		97
Book Review		465
Indexes		466

Classified Contents

Abstracts—French, 97
Abstracts—German, 99
Acetylene, from solvent extracts of coal, 443
Adsorption, of dyes from soln by carbonaceous solids, 345
—isotherms, discontinuities, 329
Alkylation, reductive, of lvb coal, 432
Analysis, detn, of C and H in solid fuels, 23
— —of Cl and Na in coals, 65
— —of pyrite in coals, 453
—petrographic, of coals by automated scanning, 226
Aromatic compounds, calcn of mol. wt in petroleum fractions, 298
Asphaltenes, Athabasca, oxidative degradation of, 211
— —p.m.r. spectroscopic examination of, 102
— —reaction with halogen, 58
— —reactions with metal chlorides, 175
— —water-soluble derivatives, 34
—petroleum, l.t. coking of, 332

Carbons, active, adsn of dyes from aqueous soln, 345
—reactions with activated hydrogen, 254
Carbonization, of powdered coal, entrainment, response surface analysis of data, 381
Carbonized coals, solvent extraction with chloroform, 113, 122, 338
Carbonized vitrinites, dispersion of optical properties, 4
Carboxyl groups, estn of in coals, correction for adsbd acid, 222
Chars, adsn of dyes from aqueous soln, 345
Chloroform extraction, of bituminous coals and chars, nature of extract, 338
—of coals and chars, mechanism, 113, 122
Coals, adsorption of dyes from aqueous soln, 345
—alkylation, reductive, 432
—bituminous, nature of chloroform extract, 338
—brown, evolution of water from, 201
— —sorption of water on, 236
—carbonization of, rapid, data analysis, 381
—carboxyl groups in, estn of, 222
—dehydrogenation, H_2 yields from whole, 152
—detn of Cl and Na in, 65
—Dubinin-Radushkevich adsn isotherms on, discontinuities in, 329
—gasification with H_2, mechanism, 77
—germanium in, binding of, 272
—grindability of, 405
—H_2, reaction with activated, 254
—igneous intrusion, effect on properties, 280
—i.r. spectra of Japanese, 53
—micropore structure of, 187
—mineral matter characteristics, 135
—moisture, adsn on coals, 236, 308, 367
—petrographic analysis, by automated scanning, 226
—smaller molecules in, 318
—solubilization, 432
—solvent extracts of, prodn of C_2H_2 from, 443
— —nature, 338
—solvent extraction with chloroform, mechanism, 113, 122
—spontaneous heating, water sorption and, 367
Cokes, scanning electron microscopy of, 457
Coking, chloroform extraction as test for mechanism, 113, 122
—effect of vitrinite content on coke strength, 41
—l.t., of petroleum asphaltenes, 332

Dehydrogenation, of whole coals, 152

Editorial, 2

Fluidization, provision of low stable flows of fine particles, 394

Gasification, of coals with H_2, mechanism, 77
Germanium, in solid fuels, forms of binding, 272
Grindability, of coals, shales etc., 405

Halogens, elemental, reaction with asphaltenes, 58
Heating, spontaneous, of coals, role of water sorption, 367
Hydrogen, activated, reactions with coals and carbons, 254

Igneous intrusion, effect on coal properties, 280

Light scattering, small angle, from wood, peat, lignite, 454
Lignite, light scattering from, 454

Macerals, carbonized vitrinites, dispersion of opt. props, 4
—change in, 218
—effect of vitrinite content on coke strength, 41
Methane, direct prodn from coals, mechanism, 77
Micropore structure, of coals, 187
Mineral matter, in coals, characteristics, 135
Moisture, adsn on coals, 308
—in brown coals, evolution of, 201
—sorption on brown coals, 236
— —on coal and spontaneous heating, 367
Molecular weight, of aromatic compds in petroleum fractions, 298

Neutron activation analyses, detn of Na and Cl in coals, 65
Nuclear energy, future of, 157

Obituary, Dr W. Idris Jones, 462
Oils, heavy, reactions with metal chlorides, 175
Optical properties, of carbonized vitrinites, 4
Overseas Correspondents' Notes, 95, 334, 463
Oxidation, degradation of asphaltenes, 211

Particles, fine, low stable flows of, 394
Peat, light scattering from, 454
Petroleum, fractions of, aromatic compds, calcn of mol. wt, 298
Pyrite, detn in coals by x-ray diffraction, 453

Recent developments and notes, 91

Scanning electron microscopy, of coke, 457
Shales, grindability of, 405
Solid fuels, carbon and hydrogen detn in, 23
Solubilization, of coals, 432
Storch Award 1971, 461
Submerged arc reactor, for C_2H_2 from coal-based feedstocks, 443

Wood tissue, light scattering from, 454

Recent Developments and Notes

Notes dealing with selected subjects related to the following fields will be found by reference to the pages indicated:

Coal carbonization and coke, 91–92

Coal industry, 93–94

Coal petrology, physics, chemical constitution and reactions, 92, 93

Polymer industry and gasification, 93

Petroleum, oil-shale and natural-gas technology, 94
